Robotic Pool Cleaners

DOLPHIN SWASH

DOLPHIN SWASH CL

DOLPHIN SWASH TC

Dolphin Swash

Plug & play cleaning of the pool floor and the hard-to-reach floor-wall angle. Small, lightweight and easy to handle, this autonomous unit requires no pre-installation or connection to pool systems.

Dolphin Swash CL

This reliable pool-wide cleaner, leaves the pool floor and walls sparkling clean, ready for family swimming fun. Adjustable handle floats help ensure no area is missed.

Dolphin Swash TC

Dual-drive motor with extended maneuvering capabilities for exceptional pool coverage. Remote control with set-up of parameters, cleaning programs and manual navigation for pin point cleaning. Weekly timer on power supply enables setting of weekly schedule for the week ahead. Change filter and operation delay indicator.

Total pool cleaning

Efficient scanning and filtering ensure accurate and effective cleaning of any pool shape, type and size.

Pure hygiene

Powerful brushing helps to prevent germination of algae and bacteria, greatly reducing chemicals costs.

Cost-effective pool care

Advanced cleaning technologies save water and energy and reduce backwashes, because Dolphins are total independent of your filtration equipment.

Minimum service costs

Ease of use and maintenance and proven, long-lasting reliability virtually eliminate after-sales care.
